

# Stop the Water Grab in Lee & Bastrop Counties!

## *Did you know that?*

- Private water profiteer -- Forestar Real Estate Group -- while claiming to be a "good corporate citizen", is suing our all volunteer Lost Pines Groundwater Conservation District to force them to release large amounts of Lee and Bastrop Counties' groundwater to be piped to the IH-35 "growth corridor", endangering our aquifer, local wells and our long-term water supply.
- Other groundwater districts are releasing large amounts of water from the same aquifers.
- Another profiteer, EndOp L.P., is also pressuring Lost Pines GCD too?
- Our elected officials from both parties are letting this happen. Some stand to even profit!

## *What can YOU do? Take these three steps:*

**Step 1:** Sign our Petition for Local Control and Property Rights. It's on the home page of our website at [www.StopWaterGrab.org](http://www.StopWaterGrab.org)!

**Step 2:** Come to a local meeting planned for your area and pick up a yard sign!

**Step 3:** Join our citizen's movement for local control and political reform by becoming a member of the League of independent Voters of Texas!
